MWSS SUPPLEMENTAL RULES

MWSS Data Logger Requirement- ISR Approved 10/25/2023.

Within the ISR rules a Regional Affiliate may make an amendment for beginner classes. The amendment is as follows:

In all ECU REV limited classes access must be provided for technical inspection purposes; a data logger will not be required for MWSS events.

However, any rider/driver that is also competing in **ECU REV limited classes** in National Events **will be required** to run a data logger during all MWSS events. For those not running National Events and do not have a data logger if data verification becomes a need the Race Director and or the Tech Directors have full discretion to require a rider/driver to install a data logger for the next weekend of racing. Failure to do so will end in disqualification.

Data Logger Rule as Written by ISR

SNOCROSS JUNIOR CLASSES

VERIFICATION EQUIPMENT REQUIRED

In all ECU REV limited classes access must be provided for technical inspection purposes.

NEW FOR 2024 YOU MUST HAVE!

1. Data logging in RPM restricted classes is mandatory and access to data logging equipment must be provided to technical inspection officials. Data Logging equipment must use OEM CAN protocols. This requirement is mandatory in National Events.

Regional affiliates may offer a beginner class that will not require this equipment.

2. The penalty for violation of the correct data logging parameters will be a 3-event day suspension in the specific class for the first violation, and suspension for the balance of the season for any following event.
