

TEKVEST .COM

OR

Two levels of coverage to offer you

Whether you ride dirt or snow, TekVest can now offer you two coverage concepts;

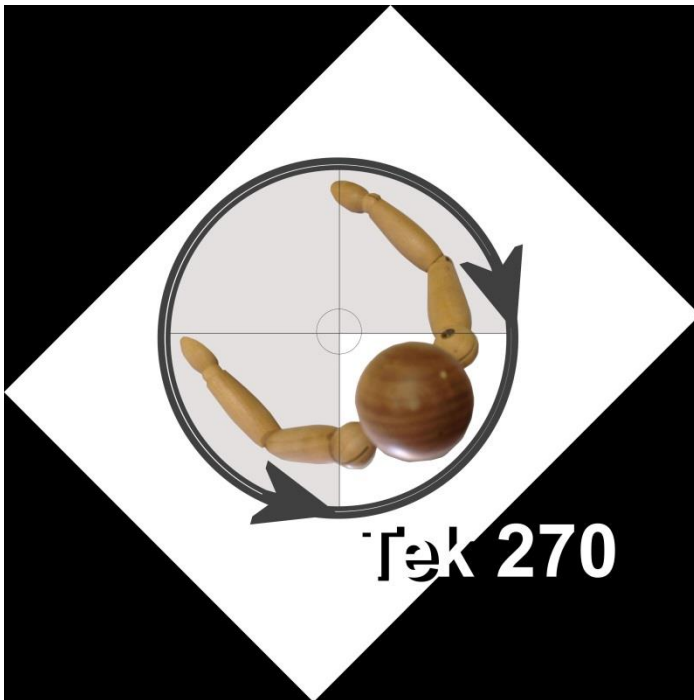

Tek4D for traditional 360 degree coverage!
(Meets ISR regulations)

Or

The all new Tek3D for 270 degree coverage!
(Do not meet ISR regulations)

Do not meet ISR regulations

12 NOV 13

Meets ISR regulations

Tek4D for traditional 360 degree coverage!

Tek4D coverage = sides + shoulders + front + back

- All TekVest models made before 2013 are Tek4D
- Only Tek4D models are approved for ISR sanctioned snowmobile racing.
* note: some disciplines require arm pads to meet rules.

10. The use of upper body protection equipment is mandatory, except for enclosed cockpits. The upper body protection must cover all body areas shown in illustration. It will protect the driver in mid-body and back areas and be capable of resisting penetration and dissipating force of impacts while absorbing the shock of most blows. Typical motocross vests do not meet this rule.
11. (Cross Country / Sno Cross) Shoulder pads must be added to upper body protection (see illustration).

These Tek4D models meet ISR regulations

* optional arm pads required for some ISR disciplines.

Rally

Sold with permanent arm pads

*TrailPro **

SX ProLite

Sold with permanent arm pads

*SuperSport **

*FreeStyle **

These Tek4D models meet ISR regulations

* optional arm pads required for some ISR disciplines.

*2 x Polaris models **

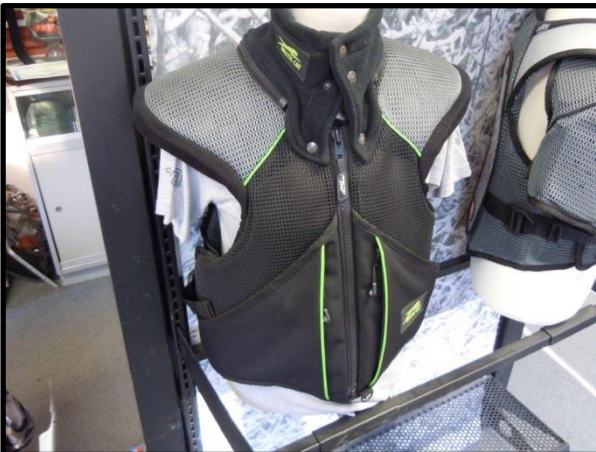

*Sled Diva **

*Yamaha **

*3 x Arctic Cat models **

*509 Backcountry **

*KLIM **

These Tek4D models meet ISR regulations

NOTE TO ALL RACE PROMOTERS

1. TekVest has made many custom models over the years.
2. They may be hard to identify.
3. They should all have TekVest inside labels and outer rubber labels.
4. Any vest which does not have either of these logos is likely not a TekVest.
5. When in doubt send us a picture and we can verify it for you . steve@tekriders.com

The all new Tek3D for 270 degree coverage Tek3D coverage = sides + shoulders + front

- The all-new Tek3D back design is compatible with your existing back pack, hydration pack or avalanche pack. Compatible with all current neck braces.
- The traditional back panel has been modified to increase air gap and airflow and reduce operating temperatures under pack. *** Does not meet ISR specs**
- Designed specifically for the mountain/backcountry snowmobiler, or off-road ADV/Enduro rider, who stand up while riding most of the time. Riders will appreciate taller cut.
- This is now the lightest TekVest ever made & coolest running!

Tek3D for 270 degree coverage

Two new Tek3D models to choose from in 2014/15

*The
CrossOver*

*Both models are
neck brace ready!*

***These 2 models
DO NOT meet
ISR regulations***
